Summary

Data Analyst with **3 years** of experience in **credit and risk analytics**, **data management**, and large-scale **reporting & insights**. Specialized in the data and analytics supporting regulatory **Expected Credit Loss (ECL)** estimation under the **CECL** and **IFRS 9** frameworks and **CCAR** capital adequacy; skilled at building **ETL workflows**, strengthening **data governance**, and delivering insights that drive Finance, Modeling, and Technology decisions.

Experience

AMERICAN EXPRESS - Credit & Fraud Risk

Gurugram, India

Analyst, Regulatory Risk Data Management & Capabilities

Aug 2023 - Apr 2026

- Led **10+ risk-event impact assessments** spanning customer linkage changes, variable-centric logic, and data risk events, protecting **\$13M+ (87%)** of the Commercial portfolio reserve by identifying root-cause drivers and building remediation that was adopted across teams.
- Designed the data strategy to integrate **Extended Payment Terms (EPT)** into the data feeding **Gen 7 CECL** Commercial models across US and international markets, improving loss-forecast accuracy for **12,000+ Card Members**, removing high-risk manual provision adjustments, and reducing downstream partner effort by **20%**.
- Built the **Analytical Data Layer (ADL)**, a fully automated **17TB+** Google BigQuery pipeline powering **Probability of Default (PD)**, **Loss Given Default (LGD)**, and **Exposure at Default (EAD)** model development, removing manual intervention and cutting external audit risk by **50%**.
- Owned **CECL Model Performance Tracking (MPT)** and back-testing end-to-end as sole maintainer, adding ad-hoc features and parameterized inputs for zero-touch quarterly reporting, cutting manual effort by **80%**.
- Drove CECL/IFRS 9 **data governance** and reporting across multiple data layers, resolving **540+ data quality alerts** on model input variables and prioritizing them by business impact to protect regulatory model integrity.
- Engineered a macroeconomic **data pipeline** supporting the **CCAR 2025** stress-testing model, enabling capital adequacy calculations across the full portfolio suite.
- Automated an end-to-end **Quality Control (QC) reporting** pipeline for model development data and ADL updates, producing audit-ready trend files that gave Finance partners decision-ready insights and cut their effort by **10%**.
- Migrated **10+ scripts** and intermediate tables holding **5TB** of regulatory data from legacy Cornerstone to the **GCP-based LUMI** platform, improving scalability and governance for portfolio risk analytics.

Associate Intern, Corporate Regulatory Data Management

Jan 2023 - Jun 2023

- Improved the **Forecasting and Sensitivity Tool (FAST)** by redesigning the UI, writing technical documentation, and building a variable sensitivity feature with Excel/CSV upload for custom input tuning, and set up **GitHub-based version control** for the codebase, increasing tool usage **15%** across Finance and Modeling stakeholders.
- Optimized distributed data processing code for large-scale datasets, cutting runtime from **48 to 6 hours (87.5% reduction)** and driving FAST's formal adoption by the Enterprise Technology team.

Education

Vellore Institute of Technology (VIT), Vellore

2019 - 2023

B.Tech in Computer Science & Engineering (Information Security); CGPA: **9.30/10**

Tamil Nadu, India

Skills & Tools

Programming & Libraries: Python (pandas, NumPy, scikit-learn, Matplotlib, Seaborn), SQL, HiveQL, PySpark

Big Data & Cloud: Google BigQuery, Airflow 3.0, Docker

AI & LLM Tools: Claude API, Pydantic, LangChain, LangGraph, OpenAI Console

Tools & Methodologies: Git, GitHub, Jupyter Notebook, JIRA, MS Office (Excel, PowerPoint)

Others: Data Analytics/Visualization, Risk Management, Compliance & Stakeholder Management, Problem Solving

Achievements & Awards

Analyst of the Quarter | Q2'24 for Model Performance Tracking.

Star of the PI | Q4'24 and Q3'25.

Merit Certificate, VIT Vellore | Academic Year 2019-2020.
